

# ULTRACUT TERBIA DUO

## Multi-functional ultrasonic cutter with manifold cutter head

The Ultracut Terbia Duo is a multi-functional ultrasonic cutter. The machine is equipped with two or more ultrasonic cutters adjustable in different heights. The machine will automatically select the optimum combination of the ultrasonic cutters. This would enable to omit an elaborate changeover procedure. The individual piece sizes, segments and cutting speeds are freely adjustable via an intuitively operable touch panel. A conveyor belt will help the operator to convey heavy and large products in the machine. During the cutting process, other products can be placed and baked goods that have been cut can be removed.

- Manifold cutting head, adjustable (standard 90/190)
- Intuitively operable touch panel
- Man-sized doors, full accessibility
- Easy and rapid cleaning of the machine
- Multi-functional ultrasonic cutter
- Compact machine design
- Cutting freely on the belt
- Cutting in the baking tray with tray detection
- Line-suitable
- Easy and rapid cleaning of the machine
- Hygienic knife cleaning system
- Integrated KnifeGuard blade guard
- Comprehensive recipe management

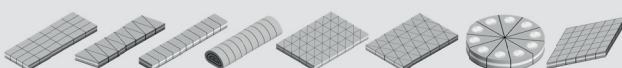

Optional: with other conveyor belts

### TECHNICAL DATA

Length	3929 mm
Width	2000 mm
Height	2244 mm
Weight	about 1100 kg
Item No.	75000032

### CUTTING FORMS

### ADDITIONAL MODULES

- Fixable rollers
- Recirculation system for baking trays
- Disinfection station Sterilisation with UV light
- Laser projection system
- Device with replaceable head
- Remote maintenance module
- Centring device for "round products"
- Carrier plates

Baking tray sizes: Usual baking tray sizes of up to 600 x 800 mm  
 Round products: diameter of up to 350 mm. Other sizes upon request.
