

# ULTRACUT EOS

## Compact universal cutter with manifold cutter head

The compact Ultracut Eos stands out with its versatility. Using this ultrasonic cutting machine, it is possible to perfectly cut all baking tray sizes of up to 400–600 mm and round pies. The products to be cut will be manually inserted into the machine. An encoded carrier plate system ensures a simple and exact centring of the products below the cutting head. A safety light grid at the front protects the operator and immediately switches off when activating the machine.

The machine is equipped with two or more ultrasonic cutters moving towards one another. They will be automatically be positioned depending on the loaded recipe. The desired cutting pattern (recipe) will be entered via an easy-to-operate touch-panel, without the need for an additional programming.

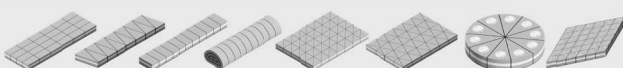

- Multi-functional ultrasonic cutter
- Equipped with a multiple cutting head
- Compact machine design
- Cutting on the cutting support or in the baking tray
- Easy operation via touchscreen
- Easy and rapid cleaning of the machine
- Program-controlled knife cleaning with fresh water
- Integrated KnifeGuard blade guard
- Versatile cutting functions

### TECHNICAL DATA

Length	1686 mm
Width	1365mm
Height	1964 mm
Weight	about 750 kg
Item No.	75000059

### CUTTING FORMS

### ADDITIONAL MODULES

- Sterilisation with UV light
- Remote maintenance module

Baking tray sizes: Usual baking trays such as 200 x 600 mm and 400 x 600 mm. Round products: up to 350 mm
